**Specifications:** pH Neutral peel-'n-stick spacers. Available in clear, black and white (all sides uniformly finished to avoid mismatched sides). Cuts easily using common shop tools such as cutting sheers, fillet trimmers and foot choppers. Easy and quick to install for metal or wood frames with glass or plexi. Aggressive double-sided tape adhesive for secure bonding.

**Uses:** DECOR Archival Glass & Art Spacers™ are ideal for a variety of professional picture framing applications.

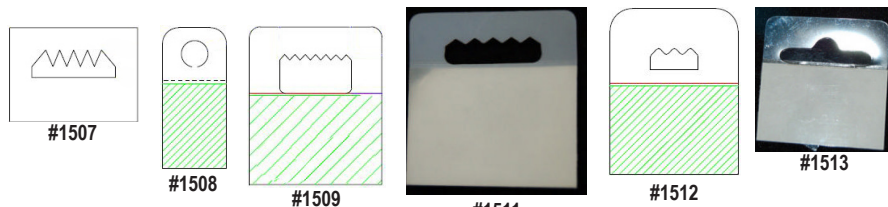

- All archival applications involving glazing should incorporate Archival Glass & Art Spacers™ to keep the artwork or print away from the glass or acrylic to avoid image transfer and

condensation damage.

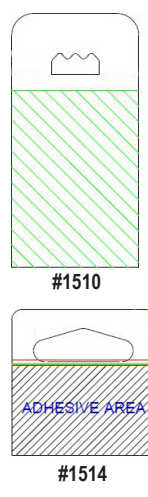

- Photographs are particularly susceptible to humidity damage resulting from contact with glazing surfaces.
- Pencil, pastels, charcoals and even a child's crayon masterpiece should not contact a glazing surface as all dry mediums are very subject to image transfer.
- Textured mats, fillets, fabric wraps, needlework and float mounting would be flattened or distorted if not separated from the glass.
- Can be stacked to achieve the space you require.

**PRESSURE SENSITIVE ADHESIVE HANGERS**

Slot hang tabs are ideal for both single- and double-wire peg hooks. Slot hang tabs allow you to display your product vertically, face-forward, anywhere in the store. Display more in less space. Your products will self-center and load easily.
